Bariatric Seating

Today's facilities should carefully consider the needs of the bariatric client. The prevalence of obesity has steadily increased over the years. Standard practice suggests that 10-20 percent of a facility's seating space should accommodate bariatric needs.

KI offers six bariatric collections with seating and design continuity throughout any facility. Chairs can be upholstered in Crypton®, Gore™ Seating Protection, COM or Pallas® Textiles. An optional moisture barrier is also available. When using suitable fabrics, the chairs meet TB133.

Cycle tested to exceed ANSI/BIFMA standards to safely accommodate a person weighing up to 750 pounds, chairs offer a structural steel inner frame and active seat suspension for maximum strength and stability. KI also extends a lifetime warranty.

And, the bariatric seating offers a long lifespan with field recoverable seats and backs standard on Briar, Flex, Perth and Three (which also offers recoverable arms). Arisa offers field recoverable seats only. Complete replacement seats, back and arms are standard on Soltice.
