

Soltice[®]

Glider

soothing motion | stylish design | exceptional stability

Furnishing Knowledge[®]

Therapeutic comfort with a residential look.

Feel at home while healing.

The Soltice glider exudes an inviting home-like look and feel. Its stylish design enhances and refreshes the environment.

Soltice® Glider

Discover how the soothing motion of the Soltice glider helps to relax and comfort patients. Designed to swivel a full 360 degrees, it rocks gently back and forth while the patient's feet rest comfortably on the floor. A ball bearing mechanism provides smooth, easy movement and the tubular metal ring base ensures exceptional stability in all positions.

The Soltice glider comes with a solid hardwood frame that has glued finger-joints and double dowel styles. The backs, arms and seats are field replaceable. Seats and backs are attached to the arm frame with a metal-to-metal hinge connection, while the arm caps attach using compression dowels.

In addition to the glider, the comprehensive Soltice collection offers a wide range of complementary patient chairs, recliners, sleepers, lounge and guest seating options to allow for a beautifully consistent look throughout a facility.

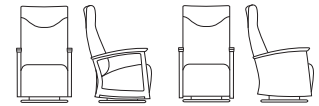

The Soltice glider gently rocks back and forth while the patient's feet rest comfortably on the floor.

The Soltice glider smoothly swivels a full 360 degrees.

Specifications
