

# Active Components™

## Inviting, Personal, Resourceful Spaces

With real estate at a premium, organizations are being tasked to find new ways to maximize space with smart, multi-use, and agile products that improve efficiency while supporting employee engagement and the diverse ways people work.

Active Components offers solutions that help make people and space more adaptable and effective, with light, appropriately scaled pieces designed especially for compact footprints. Clever vertical storage options and suspended elements make use of underutilized space and free up working area to create inviting, comfortable workspaces with flexible elements that support both collaboration and focus work.

## Deconstructed Design

Active Components was inspired by deconstructivist architecture, which is characterized by manipulating a structure's surface or shape. Similarly, Active Components defies visual logic. A variety of pieces come together on multiple planes to take advantage of underutilized space with parallel, perpendicular, or cantilevered planning approaches.

### Draw People In

The variety of shapes, configurations, textures, and mix of materials create comfortable, cozy workspaces that evoke a residential atmosphere. Active Components freshens up a space with warm elements that support changing postures, memory cues, collaboration, and focus work—creating inviting spaces that draw people in and foster engagement.

### Make Every Inch Count

Designed specifically to fit into smaller workstations, Active Components maximizes space while supporting worker performance. Suspended pieces provide smart, multi-use storage while accessories and floating shelves create vertical storage to optimize the footprint.

**Offer Variety and Choice**

Active Components helps make open-plan spaces perform better for people working individually or in groups through elements that range from accessories to furniture. Open and light in scale, it brings a sense of improvisation and energy to the workspace, enabling personalization and adaptability to suit people's needs.

**Design Choices**

The expressive qualities of Active Components provide more options to create inviting spaces that convey unique characteristics of corporate and individual brand. A wide range of colors, fabrics, and material types create a residential look, adding color, texture, and warmth to the space. Part of Haworth's Integrated Palette™, Active Components integrates with several popular product solutions. Current Haworth customers can easily add Active Components to an existing workspace to enhance culture and brand.
