Walls & Partitions

Modular Walls

Perfect for creating offices, conference rooms and room partitions. These walls are easily installed without construction and can include power and data accessibility.

Walls are manufactured and delivered in finished sections for easy tilt up installation. Panel sections are available in solid, glass and combo sections. Doors are available in swing or sliding configurations.

Solid panel surfaces are available in:

- Painted Steel
- Solid or Wood Grain Laminate
- Vinyl Wall Covering
- Fabric Wall Covering
- Markerboard

Solid walls have a 44 SCT acoustics rating.

Camp Pendleton

Our customer needed to separate workspaces and a meeting area. They needed privacy but did not want to sacrifice their natural light so we utilized frosted glass and white finishes to enhance the natural light in their space.

Camp Smith

Our customer's existing space was reallocated for office use. The end user saved time, money, and a lot of red tape by avoiding a construction job and installing our modular walls instead. A project that would have taken months and months was completed in a matter of days.

Lockers & Secure Storage

Heavy-Duty Lockers

Our lockers are designed for heavy use and for long term operation. Locker cabinets come fully welded with double walled doors and full piano hinges for effortless operation and strength.

All lockers are powder coat painted.

Customizable gear lockers and duty bag lockers are an ideal way to create secure storage spaces for police and military equipment. Choose from a variety of styles and sizes to suit your needs and your space.

Keep Supplies Organized

At Fort Carson, Tactical Readiness Lockers were the key to winning a Supply Excellence Award for outstanding organization, supply accountability, and secure property.

Shop Benches & Cabinets

Unrivalled Quality & Durability

Optimize your work environment and maximize your storage space with 400 Lbs. capacity drawer cabinets and a vast range of organizational accessories.

Cabinets are heavy duty and provide many possibilities for safe, secure and efficient small parts storage. Drawers have industry-leading durability and their sliding system comes with a lifetime warranty. By choosing our cabinets, you are opting for the most reliable and highest quality products on the market.

Workstations have been designed to make your workspace functional and organized. These modular workstations come in a variety of configurations to meet your needs. They can be stationary or mobile and with or without a frame over the work surface.

Workbenches

Cabinets

Shelving

Pallet Racking

Warehouse Pallet Racking

Roll-Formed Selective Pallet Rack is the most flexible and extensively used pallet rack in the material handling industry. We offer a wide variety of styles, sizes and gauges to meet most capacity and seismic requirements.

- Fast Clip Beam Attachment
- Compatible with Most Brands
- Welded Frame Design
- Cost Effective
- Flexible Applications
- High Quality Powder Coat Finish

Shelving

Heavy-Duty Adjustable Shelving Systems

4-Post Shelving that Offers More than Ordinary Metal Shelving

Create and alternate how and what you store with 4-post shelving. Our system offers more options than ordinary shelving because it's universally slotted. These slotted shelves allow for the attachment of file dividers, bin dividers and divider rods.

You can stack boxes, organize color-coded files with dividers and store other materials with compartmented bin dividers all on the same shelving unit.

Wide span shelving provides the perfect platform for storing a variety of heavy and bulky items. Designed to work in static applications as well as seamlessly integrate with a wide range of industry-leading mobile systems, the wide range of standard and configured sizes make it possible to build a custom shelving system for your needs.

Strength & Durability: Storage systems feature a roll-formed boxed-style upright post design to provide optimum structural integrity. Horizontal "Z" beam design provides strength and stability to support loads over wide spans

Versatility: Features two upright design options, three beam options (low-profile, heavy-duty, and extra heavy-duty), and five decking options to provide maximum flexibility when customizing your storage

Flexibility & Adjustability: Easy assembly, can be quickly installed or relocated

A wide variety of standard and configured sizes ensures a perfect storage solution for any space

No tools necessary for adjustment, assembly, or disassembly

Accessory Choices: Anchor feet, front to back supports, upright splices, back to back supports, and back to wall supports allow customization for virtually any need, in any space

Weapons Racks

Rigidity.

Constructed of heavy-gauge steel, the fully welded cabinets are 42.38" (1076mm) wide and 16.25" (413mm) deep with six heights 18" (457mm), 34" (864mm), 45" (1143mm), 61.5" (1562mm), 76" (1931mm) and 84" (2134mm) that accommodate weapons of varying lengths and types. Durable welded and riveted hinges prevent tampering with doors. Meets OPTNAVINST 5530.13B and AR 190-11.

Visibility.

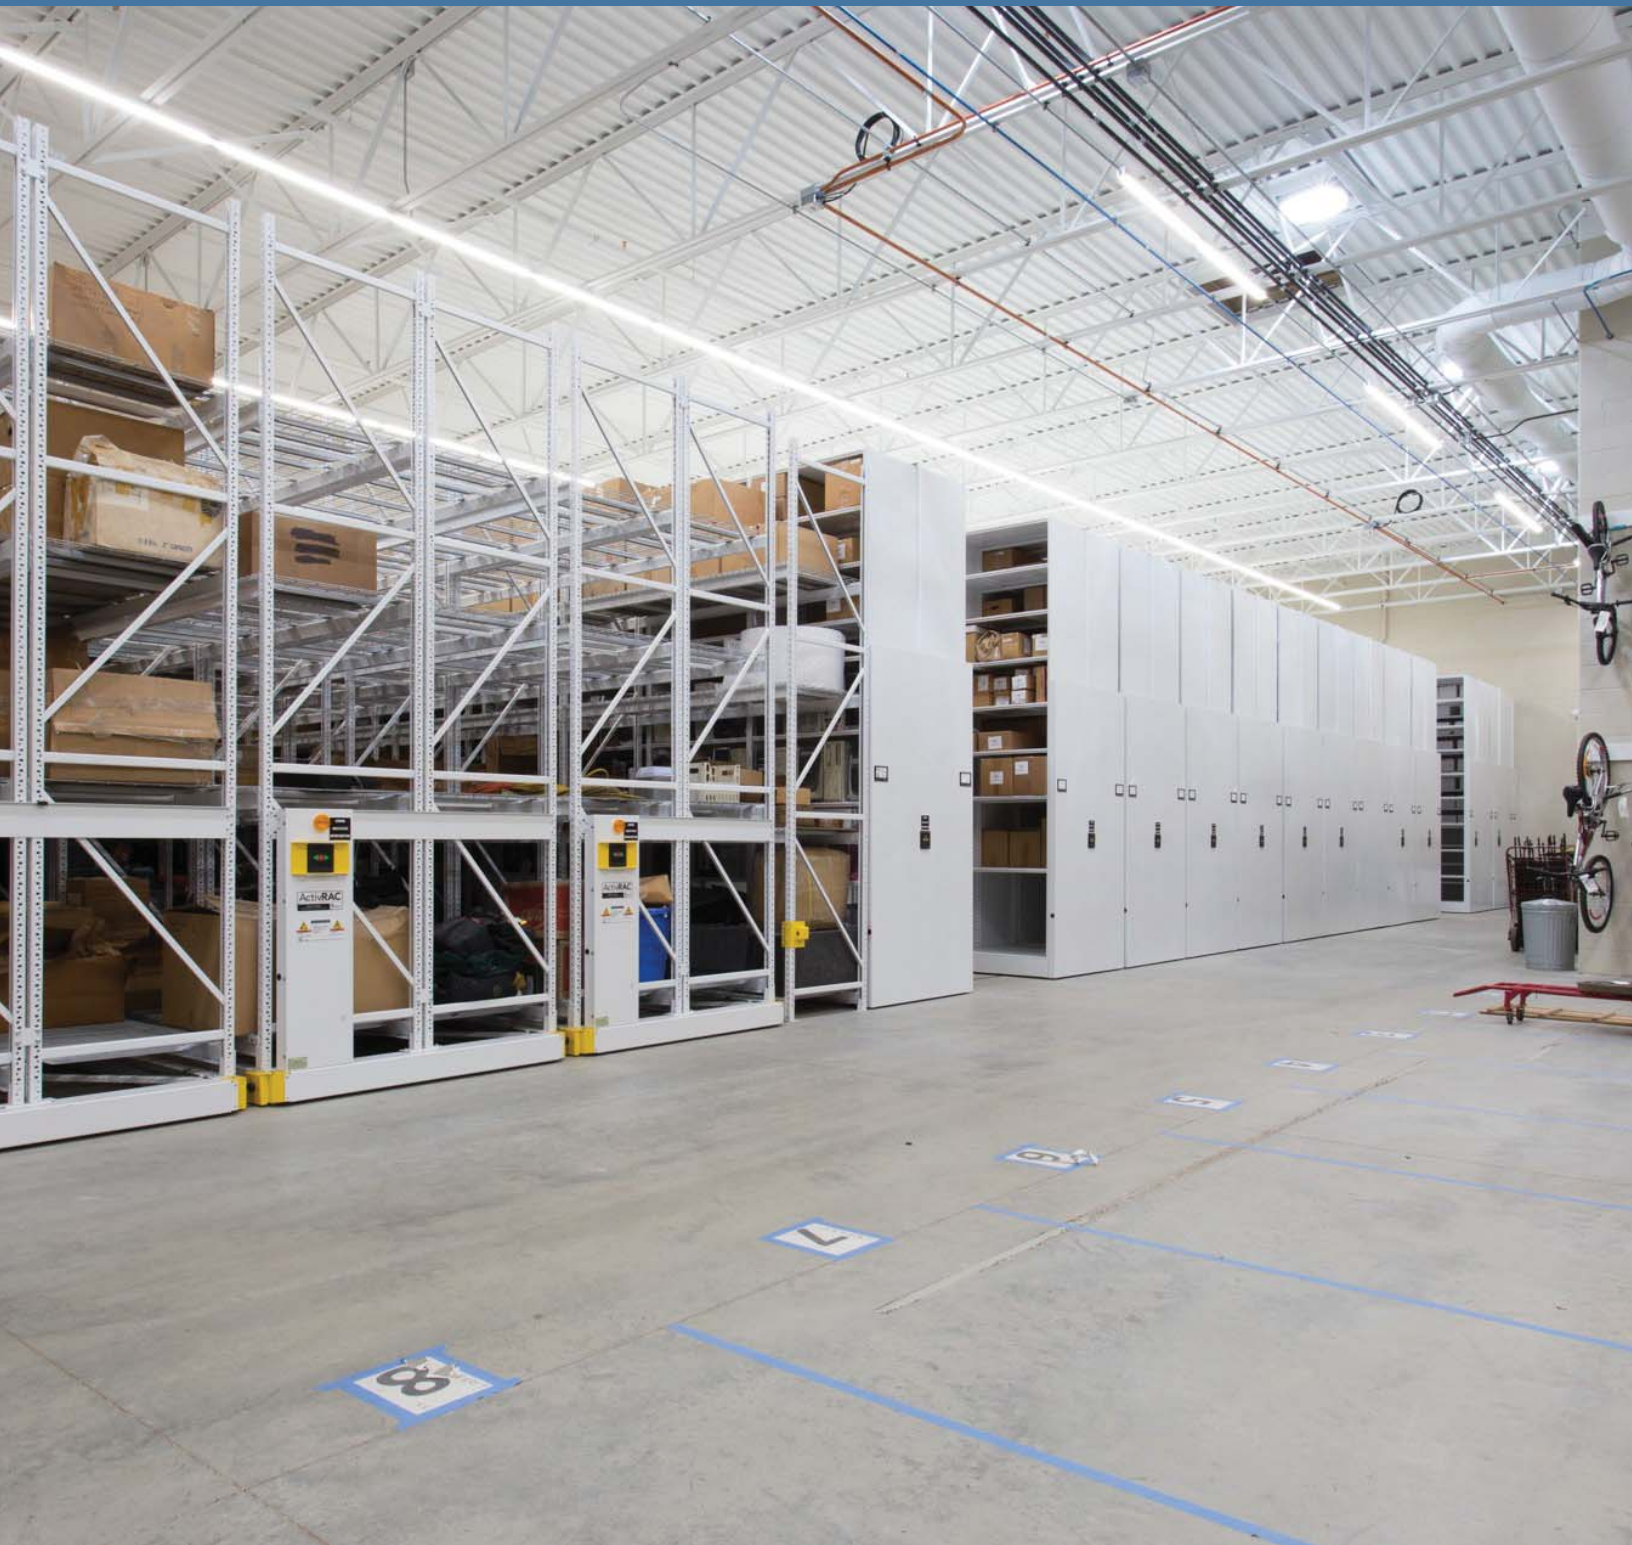

Perforated doors, sides and rear wall make weapons inventory assessments easy, while keeping weapons stored and secure.

Security.

Locking bars exceed military requirements for arms security of conventional arms, ammunitions and explosives (OPNAVINST 5530.13B and AR 190-11). The racks are designed to be ganged together from the inside – top-to-bottom, back-to-back, side-to-side – to meet security weight requirements of at least 500 lbs (227 kg).

High-Density Mobile Storage

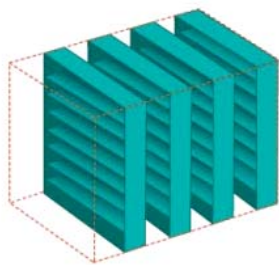

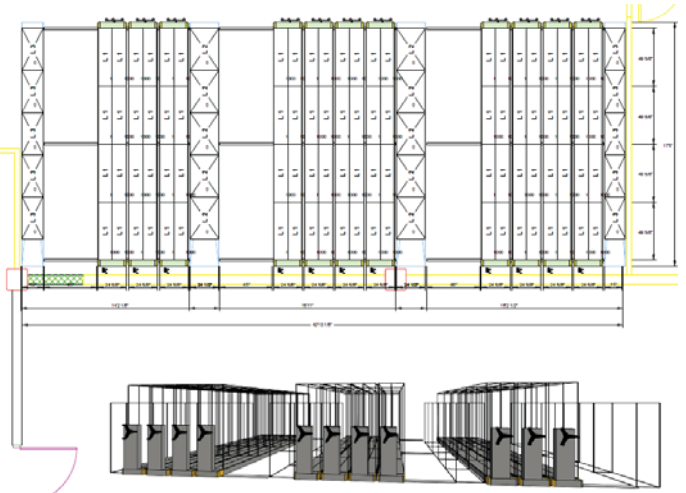

Increase Storage Capacity & Organization

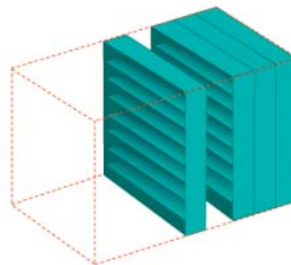

We can double your storage capacity in most existing warehouses, offices, armories or anywhere you are storing stuff. It doesn't matter what you are storing, we can come up with a solution.

High-Density Mobile Storage Systems can be configured with other storage systems such as drawers, bins, hangers, cabinets, shelving, racking and more.

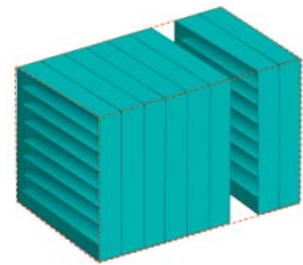

Depending on the use, systems can be configured for secure areas as well as multiuse activity. Our team will work with you to identify your challenges, space requirements and special needs. Drawings are developed to provide clear expectations and the capacity of the proposed solution.

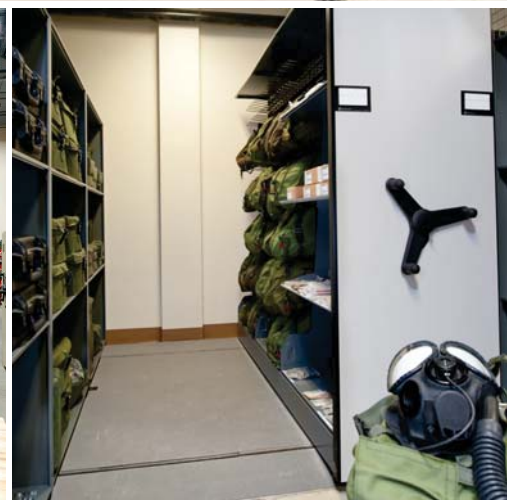

Wasted Space

Saved Space

Increased Space

Wire Cages

Create Secure Storage Space

Easily create a physical barrier guard to separate people from security or safety risks. Wire mesh cage partitions are constructed of steel mesh to allow for unobstructed views and circulation of light, air, and fire suppression systems while still maintaining its structural purpose.

Unrivaled Strength

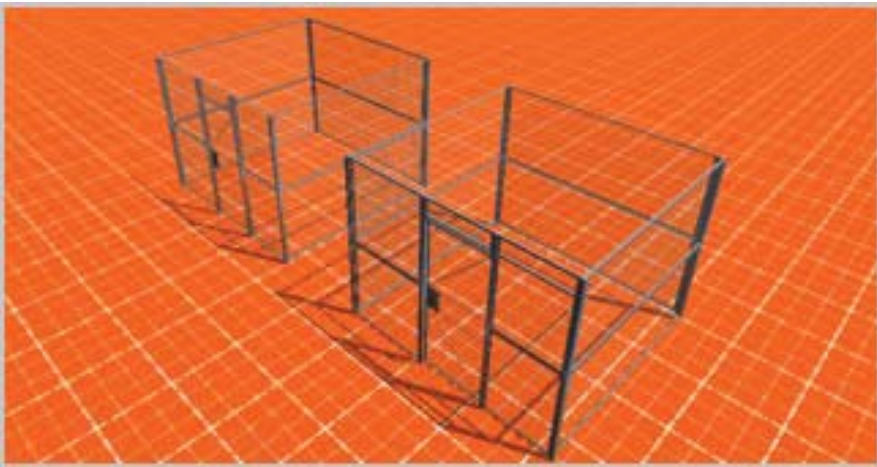

Cages come fully welded and are constructed in our standard 10-gauge or 6-gauge wire. We don't bypass the fine line between gauges which maximizes the strength and stability of our product.

Universal and Flexibly Designed Components

Mesh Cage Partitions stack panels and posts to achieve desired heights, use our growth plate to maximize the use of standard panel and post sizes and easily integrate various door locks, controlled access, and closing devices.

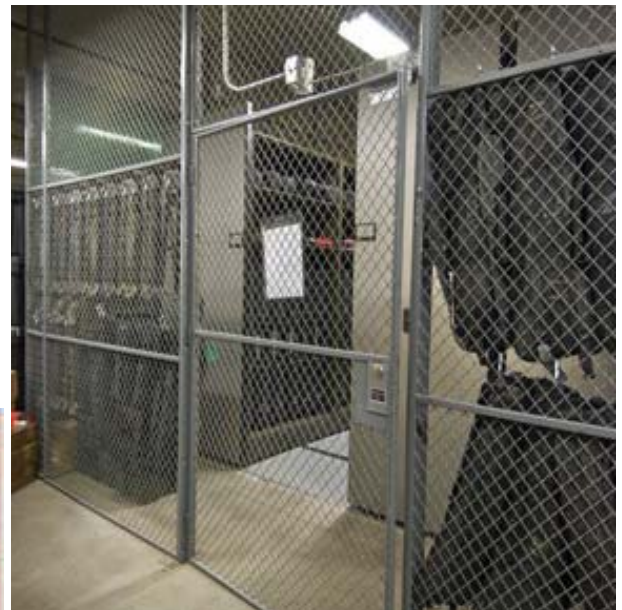

Ease of Installation = Quicker Installation Without Foregoing Security

Avoid confusion as our universal posts are interchangeable, our slide and hinged gates are reversible and can be switched from a lock to padlock setup without replacing the doors, and our welded wire construction allows for clean field cuts without damaging the integrity of the system—all while keeping all hardware on the secure side of the wire mesh partition.

Design

Easily configurable and seamless design capability mean quick response time and processing.

Twentynine Palms

Modular Buildings

Prefabricated Buildings

Using modular systems, you can build anything that can be built with traditional construction materials in less time and with less demands on your end. See how we've simplified the construction process.

At the heart of every modular wall system lies the metal stud framing; not only does this provide the structural integrity for the entire office or enclosure, but it also makes the system relocatable, attractive, and easy to assemble and wire.

Conference Rooms

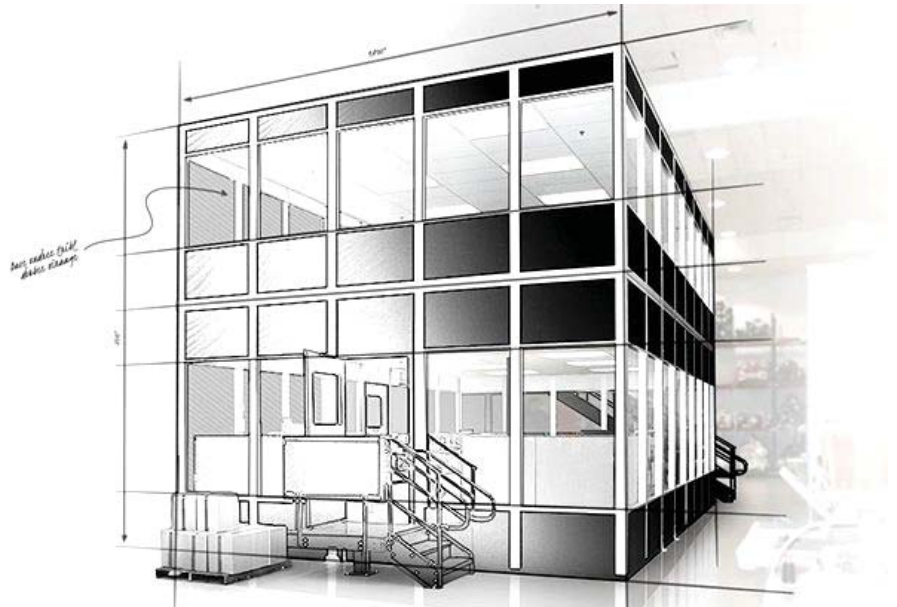

Modular conference rooms and meeting rooms keep training, safety and production meetings near the plant floor and close to the action. Modular components can be constructed quickly and are easy to adjust and reconfigure, maximizing long-term value.

Wall panels are offered in a variety of surfaces and colors for enhancing interior aesthetics, durability, and sound absorption. Window panels are available in a number of sizes and styles to meet a wide variety of applications.

Lunchrooms

With modular building systems, lunchrooms and cafeterias can be constructed in a fraction of the time involved with conventional construction. Modular lunchrooms also allow the end user additional flexibility to move or reconfigure the original enclosure with a 100% recapture of their initial investment. Free on-site design consultations are available to help you customize a floor plan that works for your individual needs.

The modular enclosures provide clean, quiet break rooms while keeping employees close on the premises.

Carpet & Vinyl Floor Tiles

Modular Flooring

We offer an integrated collection of carpet tiles and resilient flooring, including luxury vinyl tile (LVT). Our modular system helps customers create beautiful interior spaces that positively impact the people who use them and our planet.

Government sustainability objectives often affect facility construction, operation and maintenance practices. Our modular carpet tile has a positive impact on all these areas and offers viable solutions for any agency planning to modify its practices regarding resource consumption. We can support you with a thoughtfully conceived and responsive experience.

Fiber & Backings

Our products are premium quality from top to bottom. Our innovative backing systems set the industry standard for modular performance, while our carpet fibers can stand up to the daily grind.

Indoor Air Quality

Indoor air quality is proven to affect the health, well-being and productivity of the people who inhabit a space. Breathe easier with carpet that protects against the growth of mold, mildew and other odor-causing microorganisms.

Warranty

All carpet tile and LVT comes with a standard 15-year warranty that's simple and straightforward. Learn how to properly install our modular system for maximum effectiveness.

Acoustics

Sound-reducing flooring is an ideal solution to mitigate the effects of noise in any space.
