Active Components

Workspaces

With real estate at a premium, organizations are seeking new ways to optimize space and support the diverse ways people work. Active Components™ offers solutions to help people and space be more effective, with adaptable pieces created especially for compact footprints.

Open and light in scale, Active Components includes workspace accessory, personal storage, and furniture elements designed to improve efficiency and engagement. Pieces effectively utilize space in unique ways, while supporting user performance, posture changes, memory cues, collaboration, and focus work.

Deconstructed Design

Inspired by the manipulated shapes and surfaces of deconstructivist architecture, Active Components elements come together on multiple planes to take advantage of underutilized space with parallel, perpendicular, and cantilevered planning approaches.

Make Every Inch Count

Designed and scaled specifically to fit smaller workstations, Active Components makes clever use of space while supporting worker performance. Suspended pieces provide smart, multi-use storage while accessories and floating shelves create vertical storage to free up more working area.

Offer Variety and Choice

Active Components helps open-plan spaces perform better for people working individually or in groups. The flexible elements bring a sense of improvisation and energy to the workspace, enabling user control, personalization, and adaptability to suit people's needs and preferences.

Design Choices

The Active Components line offers flexible, light-scale storage, worksurfaces, screens, accessories, work tools, and a unique “Side Car” to create inviting, supportive workspaces. A wide range of color, fabric, and material options brings a residential feel and conveys the unique characteristics of corporate and individual brand.

Aligning People and Space for Optimal Performance

Your people, organization, and facilities are at the center of everything we do. We help create spaces that solve for your business needs—resulting in effective people and efficient use of real estate.
