Overview

- Flexible metal conduit construction for routing power to panels and tables
- Provides power connection between building and power distribution assembly
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with 1/2" flexible metal conduit, painted black, and 12 AWG wire (10 AWG for shared neutrals)
- Modular power head connects at receptacle location of power distribution assembly
- Use to connect between junction box of building and power distribution assembly within panel
- 3 Circuit Base Feed
 - Three line, three neutral, and two ground conductors
 - Connector head color coded black
- 4 Circuit Base Feed
 - Four line, two neutral, and two ground conductors
 - Connector head for 4 Circuit (2+2) configuration is color coded blue
 - Connector head for 4 Circuit (3+1) configuration is color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system rated for 20A 208Y/120V, 120/240V or 120V 60 Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 120V 60 Hz per Article 605
- ETL listed per UL 183 and UL 1286 and CSA standard C22.2 #203 and #203.1

Applicable Codes

- Base Feed Module must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth UniGroup Too®, UniGroup®, PLACES®, PREMISE®, Compose® panel systems and Tactics® table

Cord Base Feed Module

Overview

- Extra hard usage cord with plug for routing single circuit to panel systems
- Provides quick connection between building and power distribution assembly
- Available with 20 Amp plug for US applications or 15 Amp plug for Canadian applications
- Available with modular connector for interface to either 3 circuit or 4 circuit style power distribution assembly

Cord Base Feed Module

General Specifications

- 20 Amp 120V 60 Hertz rating for US Configuration, NEMA 5-20P plug configuration
- 15 Amp 120 60 Hertz rating for Canadian Configuration, NEMA 5-15P plug configuration
- Not for use with isolated ground receptacles
- Constructed with extra hard usage cord with 12 AWG wire
- US configuration has 24" cord per the National Electrical Code (NEC), Canadian configuration has 72" cord per the Canadian Electrical Code (CEC)
- Modular power head connects at receptacle location of power distribution assembly
- Use to connect between outlet in building and circuit 1 of power distribution assembly within panel

Listings

- ETL listed office furnishing accessory rated for USA Version 20A, Canadian Version to 15A. 120V 60 Hz per Article 605
- ETL listed per UL 1286 and CSA standard C22.2, and USA Version to UL 1286 and CSA C22.2 #203 Canada Version to CSA C22.2 #203 only

Applicable Codes

- Base Feed Module must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth UniGroup Too®, UniGroup®, PLACES®, PREMISE®, and Compose® panel systems

Typical Configuration

- Single circuit power distribution from building to panel systems

Overview

- Flexible metal conduit construction for routing power from under raised floor to panels, tables and moveable walls
- Provides connection between Power Base AI raised floor modular power and Power Base power distribution assembly
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Raised Floor Power Interface Jumper

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with galvanized flexible metal conduit 12 AWG wire (10 AWG for shared neutrals)
- Use to connect Power Base AI raised floor power components to a power distribution assembly within a panel
- One end of base feed connects to a Power Base AI jumper with the use of 2-port splitter (included), the other end connects to the receptacle connector location on a power distribution assembly with any panel
- 3 Circuit System
 - Three line, three neutral, and two ground conductors
 - Connector head is color coded black
 - Internal base feed head is color coded black
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - Connector head for 4 Circuit (2+2) configuration is color coded blue
 - Connector head for 4 Circuit (3+1) configuration is color coded green
 - Internal base feed head is color coded blue for 4 circuit (2+2) and green for 4 Circuit (3+1)
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

Wall Feed

Overview

- Modular connector with latch mounted to 4 1/16" (119mm) steel plate
- Provides connection between field supplied 4 1/16" Junction box and Haworth raised floor power interface jumper
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Wall Feed

General Specifications

- 20 Amp 120/208Y or 120/240V 60 Hertz rated circuits
- Constructed with 12 AWG wire (10 AWG for shared neutrals supplied by others)
- Use to connect between 4 1 $\frac{1}{8}$ " Junction box supplied by others and modular power jumper
- 3 circuit system provides three phase conductors, three neutral conductors and two ground conductors
- 4 circuit system provides four phase conductors, two neutral conductors and two ground conductors

Listings

- UL listed manufactured wiring system rated for 20A 120V/208Y or 120/240V 60Hz per NEC Article 604
- UL listed per UL 183 and CSA standard C22.2 #203.1

Applicable Codes

- Wall Feed must be installed in accordance with the NEC, CEC and local electrical codes

Complimentary Products

- Use with Systems Furniture Power Interface Jumper to connect power to Haworth Unigroup® Too, Unigroup®, Places®, PREMISE®, Compose® panel systems, Tactics® tables, Reside®, Beside®, Planes® Benching or Intuity®
- Use with Haworth Unigroup® Too, Unigroup®, Places®, PREMISE®, Compose® panel systems, Tactics® tables, Reside®, Beside®, Planes® Benching or Intuity® top feed to make quick connect to Power Base AI Jumper installed above dropped ceiling.
- Use with building wiring junction box for quick connect to Power Base AI Jumpers under raised floor

Typical Configuration

- Transition from building hardwire and modular power
- Conversion of furniture top feed to modular connection

Overview

- Junction box with modular power connector mounts within panel base raceway
- Complies with New York City Code
- Provides connection between building and power distribution assembly
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Concealed Base Feed Module

General Specifications

- 20 Amp 208Y/120V , 120/240V or 120V 60 Hertz rated circuits
- Constructed with 12 AWG wire (10 AWG for shared neutrals)
- Junction box constructed of 16 gauge galvanized steel with three 1/2" knockouts
- Junction box is 37 cubic inches
- Modular power head connects at receptacle location of power distribution assembly
- Use to connect conduit from building to power distribution assembly within panel
- 3 Circuit System Concealed Base Feed
 - Three line, three neutral, and two ground conductors
 - Connector head color coded black
- 4 Circuit System Concealed Base Feed
 - Four line, two neutral, and two ground conductors
 - Connector head for 4 Circuit (2+2) configuration is color coded blue
 - Connector head for 4 Circuit (3+1) configuration is color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Overview

- Flexible metal conduit construction for routing power to panels, tables and moveable walls
- Provides power connection between building and power distribution assembly
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Infeed Harness

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed of galvanized steel flexible conduit and 12 AWG wire (10 AWG for shared neutral) with ½" conduit fitting
- Modular power head connects to power distribution assembly (PDA)
- Use to connect between junction box of building and PDA within furniture/moveable wall
- Modular power connector is polarity keyed for 3 circuit, 4 circuit (2=+2) and 4 circuit (3+1) configurations
- 3 Circuit Infeed Harness
 - Three line, three neutral, and two ground conductors
 - Connector head color coded black
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - 2+2 configuration connector head color coded blue
 - 3+1 configuration connector head color coded green

Listings

- ETL listed manufacturing wiring system componnet rated for 20A 208Y/120V, 120/240V or 120V 60 Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 120V 60 Hz per NEC Article 605
- ETL listed per UL 183, UL 1286 and CSA standard C22.2 No. 203-M, #203 and #203.1

Applicable Codes

- Infeed Harness must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC) and local electrical codes.

Complimentary Products

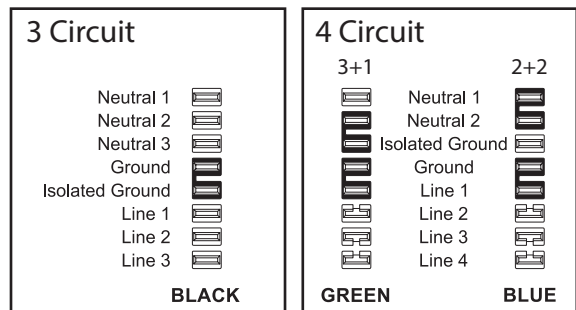

- Use with Systems Furniture Power Interface Jumper to connect power to Haworth Unigroup® Too, Unigroup®, Places®, PREMISE®, Compose® panel systems, Tactics® tables, Reside®, Beside®, Planes® Benching or Intuity®.
- Use with Haworth Unigroup® Too, Unigroup®, Places®, PREMISE®, Compose® panel systems, Tactics® tables, Reside®, Beside®, Planes® Benching or Intuity® top feed to make quick connect to Power Base AI Jumper installed above dropped ceiling.
- Use with building wiring junction box for quick connect to Power Base AI Jumpers under raised floor.

Typical Configuration

- Power Distribution from building to panel system, furniture or moveable wall

NOTE: Polarity keys (A) are on 3 circuit connector heads only.

Power Distribution Assembly

Overview

- Mounts to panel, table, or Enclose® moveable wall panel
- Provides connector locations to connect other modular power components
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configuration

Power Distribution Assembly

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with 12 AWG wire (10 AWG for shared neutrals)
- Allows connections of up to four power connectors and four receptacles
- Infeeds may connect to receptacle or power connector location, see infeed for details.
- 3 Circuit System
 - Three line, three neutral, and two ground conductors
 - Color coded black
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - Four Circuit (2+2) configuration is color coded with blue connector
 - Four Circuit (3+1) configuration is color coded with green connector
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system rated for 20A 208Y/120V, 120/240V or 60Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 60Hz per NEC Article 605
- ETL listed per UL 183 and UL1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Power Distribution Assembly must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth UniGroup Too, UniGroup®, PLACES®, PREMISE®, Compose® panel systems, Tactics® tables, Intuity®, Planes® benching, Reside®, Beside® and Enclose® moveable walls

Typical Configuration

- Power Distribution Assembly mounted within panel systems, tables, or moveable walls

Flexible Power Connector

Overview

- Use to route power horizontally between panels
- Provides connection between two power distribution assemblies
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Flexible Power Connector

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with nonmetallic raceway and 12 AWG wire (10 AWG for shared neutrals)
- Use to connect between two power distribution assemblies, panel to panel
- 3 Circuit System
 - Three line, three neutral, and two ground conductors
 - Color coded black
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - 4 Circuit (2+2) configuration is color coded with blue connector
 - 4 Circuit (3+1) configuration is color coded with green connector
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 120V 60 Hz per NEC Article 605
- ETL listed per UL 1286 and CSA standard C22.2 #203

Applicable Codes

- Flex Connectors must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth UniGroup®Too, UniGroup®, PREMISE®, and Compose® panel systems

Typical Configuration

- Horizontal power distribution within panel systems.

3-Circuit

See price list for specific application.

Extended Power Connector

Overview

- Flexible metal conduit construction for routing power horizontally
- Provides connection between two power distribution assemblies
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Extended Power Connector

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with flexible metal conduit and 12 AWG wire (10 AWG for shared neutrals)
- Used to connect two power distribution assemblies when separated by a non-powered panel or panel to panel for architectural applications which require flexible conduit.
- Available in a variety of lengths.
- 3 Circuit System
 - Three line, three neutral, and two ground conductors
 - Color coded with black connector
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - 4 Circuit (2+2) configuration is color coded with blue connector
 - 4 Circuit (3+1) configuration is color coded with green connector
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system rated for 20A 208Y/120V, 120/240V or 120V 60Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 120V 60Hz per NEC Article 605
- ETL listed per UL 183 and UL1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

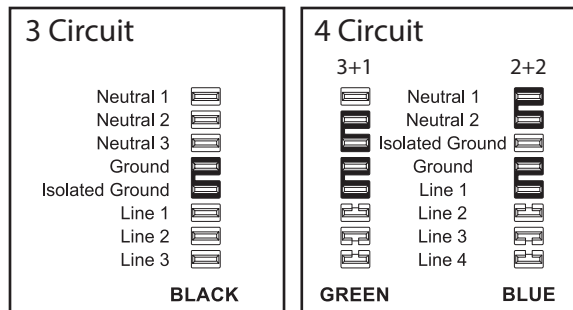

- Extended Flexible Metal Power Connector must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth PREMISE® and Compose® panel system, Tactics® Tables, Reside® and Beside®, Planes® Benching, Intuity® and Enclose® moveable walls

Typical Configuration

- Power distribution with in panel systems, table, or moveable walls

PREMISE Vertical Power Connector

PREMISE®

Overview

- Use to route power vertically within PREMISE® stackable panels (requires Super Base panel)
- Provides connection between two power distribution assemblies within a PREMISE® stackable panel
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

PREMISE Vertical Power Connector

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with nonmetallic raceway and 12 AWG wire (10 AWG for shared neutrals)
- Use to connect between two power distribution assemblies within a PREMISE stackable panel
- 3 Circuit System
 - Three line, three neutral, and two ground conductors
 - Color coded black
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - 4 Circuit (2+2) configuration is color coded with blue connector
 - 4 Circuit (3+1) configuration is color coded with green connector
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 120V 60 Hz per NEC Article 605.
- ETL listed per UL 1286 and CSA standard C22.2 #203

Applicable Codes

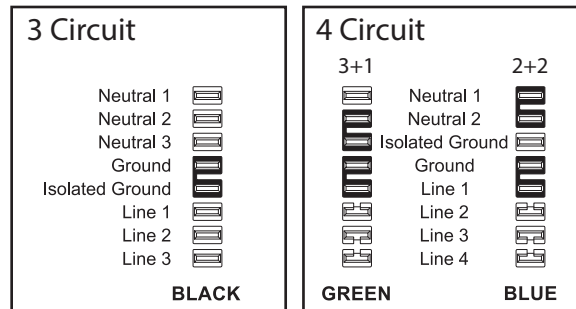

- Vertical Power Connector must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth PREMISE stackable panels system

Typical Configuration

- Power distribution within PREMISE® stackable panel system

Compose Vertical Power Connector

Overview

- Use to route power vertically with Compose® panels
- Provides connection between two power distribution assemblies within a Compose® panel
- Available in either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Compose Vertical Connector

General Specifications

- 20 Amp 208Y/120V, 120/240V or 120V 60 Hertz rated circuits
- Constructed with flexible metal conduit and 12 AWG wire (10 AWG for shared neutrals)
- Use to connect between two power distribution assemblies within a Compose panel
- 3 Circuit System
 - Three line, three neutral, and two ground conductors
 - Connector color coded black
- 4 Circuit System
 - Four line, two neutral, and two ground conductors
 - 4 Circuit (2+2) configuration is color coded with blue connector
 - 4 Circuit (3+1) configuration is color coded with green connector
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system rated for 20A 208Y/120V, 120/240V or 120V 60Hz per NEC Article 604.
- ETL listed office furnishing accessory rated for 20A 208Y/120V, 120/240V or 120V 60Hz per NEC Article 605.
- ETL listed per UL 183 and UL1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Vertical Power Connector must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth Compose® panel system

Typical Configuration

- Power distribution within Compose® panel system

NOTE: Polarity keys (A) are on 3 circuit connector heads only.

Triplex 15 Amp Receptacle

Overview

- Use to access power within PREMISE® and Compose® panel systems, Tactics® table, Reside® desking, Intuity®, Planes® Benching and Enclose® moveable walls
- Provides three 15 Amp outlets
- Available for connection to either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Triplex 15 Amp Receptacle

General Specifications

- Three outlet 15 Amp 120V 60 Hertz rated, NEMA 5-15R configuration
- Available in common ground or isolated ground configuration
- Snaps into power distribution assembly with receptacle face exposed through base raceway cover.
 - Up to 4 receptacles per power distribution assembly, maximum 2 for Moveable Walls and Tactics
- 3 Circuit Receptacle
 - Selector for access to circuit 1, 2, 3
 - Non-ground towers on rear of receptacle are color coded white
- 4 Circuit Receptacle
 - Fixed circuit access
 - Non-ground towers on rear of 4 Circuit (2+2) receptacle are color coded blue
 - Non-ground towers on rear of 4 Circuit (3+1) receptacle are color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system component rated for 15A 120V 60Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 15A 120V 60 Hz per Article 605
- ETL listed per UL 183, UL 498 and UL 1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Receptacles must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth PREMISE® and Compose® panel systems, Tactics® tables, Reside® desking, Intuity®, Planes® Benching and Enclose® moveable walls

Typical Configuration

- Power distribution within PREMISE® and Compose® panel systems, Tactics® tables, Intuity®, Planes® Benching and Enclose® moveable walls.

15 Amp Duplex Receptacle with USB Charging Outlet

Overview

- Use to access power within PREMISE® and Compose® panel systems, Tactics® tables, Reside® desking, Intuity®, Planes Benching® and Enclose® movable walls
- Provides two 15 Amp outlets and two USB charging outlets
- Available for connection to either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

15 Amp Duplex Receptacle with USB Charging Outlet

General Specifications

- Two outlet 15 Amp 120V 60 Hertz rated, NEMA 5-15R configuration and two USB 2.0 A type outlets
- 2 Amp (shared) USB Charging Capacity: 5 V DC.
- Available in common ground configuration
- Snaps into power distribution assembly with receptacle face exposed through base raceway cover.
 - Up to 4 receptacles per power distribution assembly, maximum 2 for Moveable Walls and Tactics
- 3 Circuit Receptacle
 - Fixed circuit access-circuit 1 only
 - Non-ground towers on rear of receptacle are color coded black
- 4 Circuit Receptacle
 - Fixed circuit access-circuit 1 only
 - Non-ground towers on rear of 4 Circuit (2+2) receptacle are color coded blue
 - Non-ground towers on rear of 4 Circuit (3+1) receptacle are color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed per UL 498 and CSA standard C22.2 #42

Applicable Codes

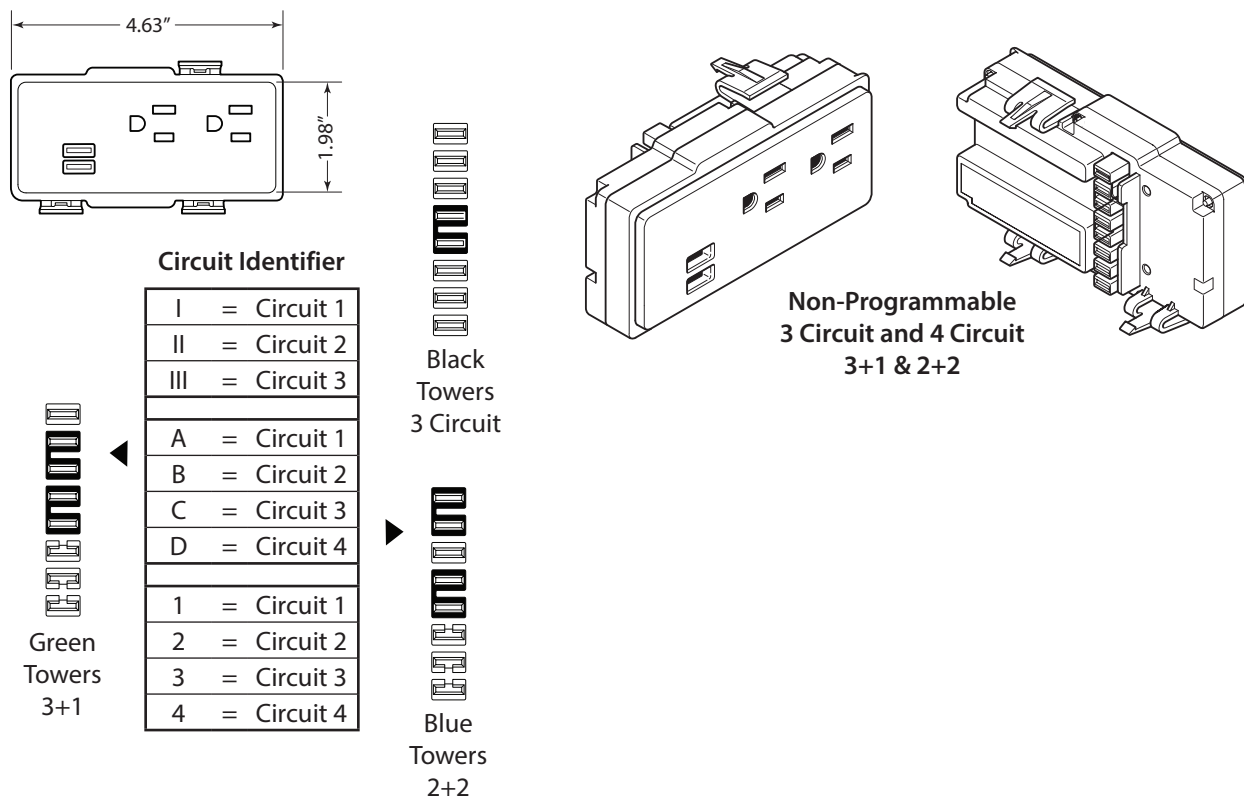

- Receptacles must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth PREMISE® and Compose® panel systems, Tactics® table, Reside® desking, Intuity®, Planes® Benching and Enclose® moveable walls

Typical Configuration

- Power distribution within PREMISE® and Compose® panel systems, Tactics® tables, Intuity®, Planes® Benching and Enclose® moveable walls

Triplex 20 Amp Receptacle

Overview

- Use to access power within PREMISE® and Compose® panel systems, Tactics® table, Reside® desking, Intuity®, Planes® Benching and Enclose® moveable walls
- Provides three 20 Amp outlets
- Available for connection to either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

Triplex 20 Amp Receptacle

General Specifications

- Three outlet 20 Amp 120V 60 Hertz rated, NEMA 5-15R configuration
- Available in common ground or isolated ground configuration
- Built to access one circuit only, circuit 1, 2, 3 or 4
- Snaps into power distribution assembly with receptacle face exposed through base raceway cover. Up to 4 receptacles per power distribution assembly, maximum 2 for Moveable Walls and Tactics
- 3 Circuit Receptacle
 - Selector for access to circuit 1, 2, 3
 - Non-ground towers on rear of receptacle are color coded white
- 4 Circuit Receptacle
 - Fixed circuit access
 - Non-ground towers on rear of 4 Circuit (2+2) receptacle are color coded blue
 - Non-ground towers on rear of 4 Circuit (3+1) receptacle are color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system component rated for 15A 120V 60Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 15A 120V 60 Hz per Article 605
- ETL listed per UL 183 and UL 1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Receptacles must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth PREMISE® and Compose® panel systems, Tactics® table, Reside® desk, Intuity®, Planes® Benching and Enclose® moveable walls

Typical Configuration

- Power distribution within PREMISE® and Compose® panel systems, Tactics® table, Intuity®, Planes® Benching and Enclose® moveable walls

15 Amp Duplex Receptacle

Overview

- Use to access power within Unigroup Too®, Unigroup® or PLACES®
- Provides two 15 Amp outlets
- Available for connection to either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

15 Amp Duplex Receptacle

General Specifications

- Two outlets 15 Amp 120V 60 Hertz rated, NEMA 5-15R configuration
- Available in common ground or isolated ground configuration
- Snaps into power distribution assembly with receptacle face exposed through base raceway cover. Up to 4 receptacles per power distribution assembly
- 3 Circuit Receptacle
 - Selector for access to circuit 1, 2, 3
 - Non-ground towers on rear of receptacle are color coded white
- 4 Circuit Receptacle
 - Fixed circuit access
 - Non-ground towers on rear of 4 circuit (2+2) receptacle are color coded blue
 - Non-ground towers on rear of 4 Circuit (3+1) receptacle are color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Listings

- ETL listed manufactured wiring system component rated for 15A 120V 60 Hz per NEC Article 604
- ETL listed office furnishing accessory rated for 15A 120V 60 Hz per NEC Article 605
- ETL listed per UL 183, UL 498 and UL 1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Receptacles must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth UniGroup® Too, UniGroup®, PLACES® panel systems

Typical Configuration

- Power distribution within UniGroup®, UniGroup Too®, PLACES® panel systems

20 Amp Duplex Receptacle

Overview

- Use to access power within Unigroup Too®, Unigroup® or PLACES®
- Provides two 15 Amp outlets
- Available for connection to either 3 circuit/separate neutral or 4 circuit/shared neutral 8 wire configurations

20 Amp Duplex Receptacle

General Specifications

- Two outlet 20 Amp 120V 60 Hertz rated, NEMA 5-20R configuration
- Receptacle is circuit 1 access only
- Plugs into the receptacle location on the left side of the power distribution assembly
- 3 Circuit Receptacle
 - Receptacle connects to 3 circuit system
 - Rear of receptacle color coded black
- 4 Circuit Receptacle
 - Non-ground towers on rear of 4 circuit (2+2) receptacle color coded blue
 - Non-ground towers on rear of 4 circuit (3+1) receptacle color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1) configuration

Listings

- ETL listed office furnishing accessory rated for 20A 120V 60Hz per Article 605
- ETL listed per UL 1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Receptacles must be installed in accordance with the National Electrical Code (NEC) and local electrical codes

Complimentary Products

- Planes® and Unigroup® 20 Amp Raceway Cover

Typical Configuration

- Power distribution within UniGroup Too®, UniGroup® and PLACES® panel systems

(A) NOTE: Polarity keys (A) are on 3 circuit connector heads only.

Hardwire Junction Box

Overview

- Two sided junction box with brackets to mount directly to Haworth furniture and position outlet in standard raceway cover openings.
- For use when local electrical codes or special performance requirements call for hardwired power distribution installed on site.
- Designed for use with ½" conduit.

Hardware Junction Box

General Specifications

- Welded and galvanized steel junction box with 35 cubic inches volume
- Junction box provided with two 1/2" knockouts at each end for branching to adjacent furniture
- Allows mounting two receptacles (NEMA 5-15R or 5-20R), one on each side
- Duplex or rectangular receptacle face plates sold separately
- Available with brackets for specific Haworth furniture, consult specific price book for proper catalog number

Listings

- UL listed for 20A 120V 60 Hz circuits
- UL listed per UL 1286 and CSA C22.2 #203

Applicable Codes

- Hardware junction box must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC) and local electrical codes

Complimentary Products

- Haworth Premise®, Compose®, Reside®, Beside® and Intuity®

Typical Configuration

- Mounted on Premise® or Compose® panels, Reside® or Intuity® power tray, Beside® cabinet

Port Kit

Port Kit Module

UniGroup® Too
UniGroup®
PLACES®
PREMISE®

Port Kit Connector

Overview

- Provides 15 Amp triplex receptacle and modular furniture telecommunications outlet opening above base raceway level for UniGroup® Too, UniGroup®, PLACES®, and PREMISE® monolithic fabric panels
- Available with modular connector for attachment to either 3 circuit or 4 circuit power distribution assembly

Port Kit

General Specifications

- 15 Amp 120V 60 Hertz rated single circuit connector and 15A triplex receptacle (NEMA 5-15R)
- Connector constructed with flexible metal conduit and 12 AWG wire
- Connector connects to right-hand receptacle location of power distribution assembly in base raceway
- Available for below work surface (PREMISE only) and above work surface panel locations
- Available with common ground or isolated ground receptacle
- Built to access one circuit only, specify circuit 1, 2, 3 or 4
- 3 Circuit
 - line, neutral, and ground conductors
 - Base connector head is color coded black
- 4 Circuit
 - line, neutral, and ground conductors
 - Base connector head for 4 Circuit (2+2) configuration is color coded blue
 - Base connector head for 4 Circuit (3+1) configuration is color coded green
- System polarity keyed for 3 circuit, 4 circuit (2+2) and 4 circuit (3+1)

Port Kit Module

Listings

- ETL listed office furnishing accessory rated for 15A 208Y/120V, 120/240V or 120V 60 Hz per Article 605
- ETL listed per UL 183 and UL 1286 and CSA standard C22.2, #203 and #203.1

Applicable Codes

- Port Kit must be installed in accordance with the National Electrical Code (NEC), the Canadian Electrical Code (CEC), and local electrical codes

Complimentary Products

- Haworth UniGroup®Too, UniGroup®, PLACES®, and PREMISE® monolithic fabric panel system

Typical Configuration

- Power access above base raceway in monolithic fabric panels

Wiring Diagram

Haworth Power Base components, are offered in three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan. All the components in the electrical system must use the same wiring schematic. The components are color coded and keyed to assure correct polarity.

- Black = Three-circuit, separate neutrals
- Green = Four-circuit, 3+1
- Blue = Four-circuit, 2+2

3 CIRCUIT	WIRE COLOR
N1	= WHITE (12GA)
N2	= WHITE RED (12GA)
N3	= WHITE BLUE (12 GA)
G1	= BARE COPPER (12GA)
G2	= GREEN YELLOW (12GA)
L1	= BLACK (12GA)
L2	= RED (12GA)
L3	= BLUE (12GA)

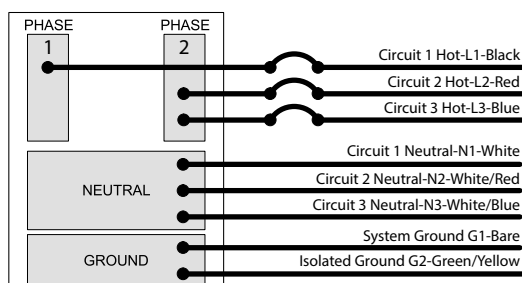

In the three-circuit, each circuit is supported with its own neutral and a common ground (L1 & N1, L2 & N2, L3 & N3).

Three 208Y/120V Phase Circuit Panel

On a 3-phase circuit panel, circuits are distributed as shown.

Three Wire Single 120/240V Phase Circuit Panel

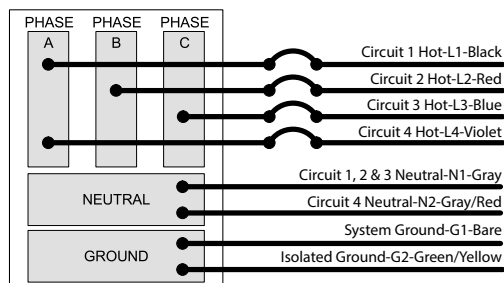

On a 3-wire single phase circuit panel, circuits are distributed as shown.

Four-Circuit, 3+1

4 CIRCUIT	WIRE COLOR
N1	= GRAY (10GA)
N2	= GRAY RED (10GA)
G2	= GREEN YELLOW (12GA)
G1	= BARE COPPER (12GA)
L1	= BLACK (12GA)
L2	= RED (12GA)
L3	= BLUE (12GA)
L4	= VIOLET (12GA)

In the four-circuit 3+1 schematic, Circuits 1, 2, and 3 are supported with one shared neutral, N1. Circuit 4 is supported with a separate neutral, N2.

Three 208Y/120V Phase Circuit Panel

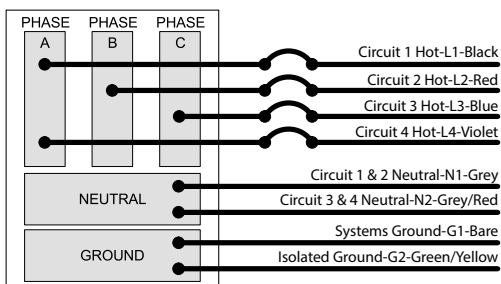

On a 3-phase circuit panel, circuits are distributed as shown.

Four-Circuit, 2+2

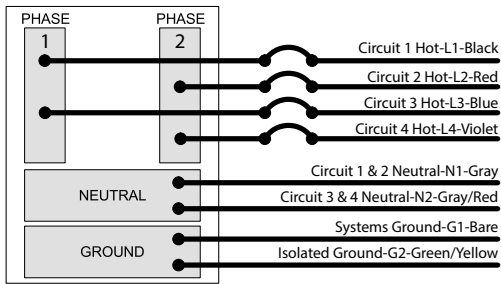

In the four-circuit, 2+2 schematic, circuits 1 and 2 are distributed from two different phases and are supported with one shared neutral, N1. Circuits 3 and 4 are distributed from two different phases and supported by their own shared neutral, N2.

Three 208Y/120V Phase Circuit Panel

On a single 3-phase circuit panel, circuits are distributed as shown.

Three Wire Single 120/240V Phase Circuit Panel

On a 3 wire single phase circuit panel, circuits are distributed as shown.

Wiring Schematic

3-Circuit Wiring Diagram:

3-3-2 Configuration

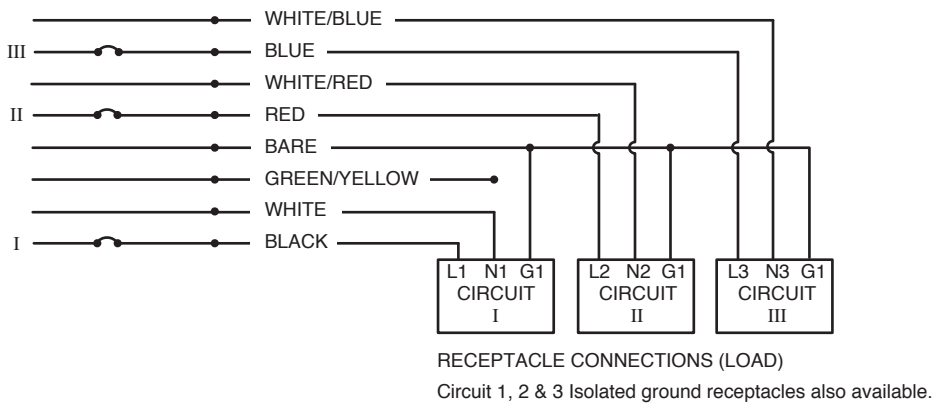

CONNECTIONS TO A GROUNDED THREE-PHASE SYSTEM

RATING: 208Y/120V. 3-PH WYE

60Hz, 20 AMP (CSA 15 AMP)

WHITE RATED AT 20 AMP (CSA 15 AMP)

CIRCUITS 1, 2 & 3 EACH USE SEPARATE NEUTRALS

4-Circuit Wiring Diagram:

2+2 Configuration

CONNECTIONS TO A GROUNDED THREE-PHASE SYSTEM

RATING: 208Y/120V. 3-PH WYE

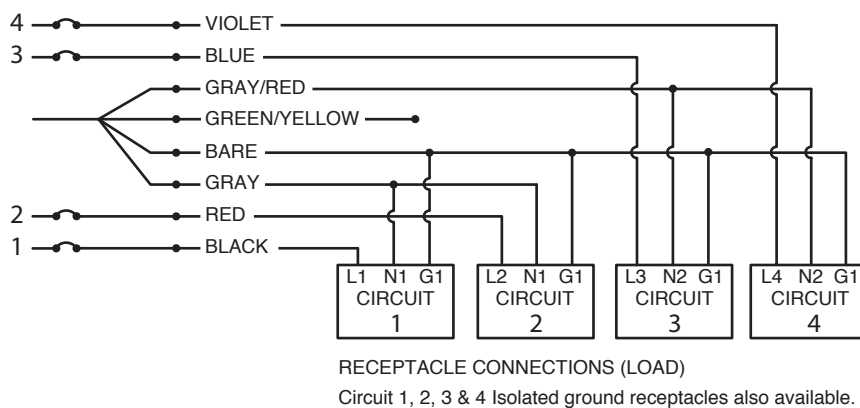

60Hz, 20 AMP (CSA 15 AMP)

WHITE RATED AT 35 AMP (CSA 26 AMP)

MULTIWIRE BRANCH CIRCUIT

CIRCUIT 1 & 2 SHARE NEUTRAL 1

CIRCUIT 3 & 4 SHARE NEUTRAL 2

Wiring Schematic (continued)

4-Circuit Wiring Diagram:

3+1 Configuration

CONNECTIONS TO A GROUNDED THREE-PHASE SYSTEM

RATING: 208Y/120V. 3-PH WYE

60Hz, 20 AMP (CSA 15 AMP)

WHITE RATED AT 35 AMP (CSA 26 AMP)

MULTIWIRE BRANCH CIRCUIT

CIRCUIT 1, 2 & 3 SHARE NEUTRAL 1

CIRCUIT 4 USES SEPARATE NEUTRAL 2

RECEPTACLE CONNECTIONS (LOAD)

Circuit 1, 2, 3 & 4 Isolated ground receptacles also available.
