STORAGE SYSTEMS

## UNIVERSAL EXPEDITIONARY™ WEAPONS STORAGE SYSTEM WITH TRICON CONTAINER (UEWSS)

The Universal Expeditionary Weapons Storage System is the first custom integrated container that is capable of storing and shipping modern small arms, crew serve weapons, associated collateral gear, and repair parts in a most secure fashion within a (Type 1) TriCON.

### FEATURES:

This system features versatile six section plug and play capability to include, but not limited to storage of M4s, M16s, M9s, M240s, M249s, M870s, M2s, MK19s, and associated collateral gear for multiple Expeditionary and Special Warfare TOA platforms.

### BENEFITS:

This system can be custom configured to store, ship, and support field weapon operations for any military community/TOA. This system supports transportation via ground, air, and sea, ensuring weapons remain stationary in the most secured fashion possible.

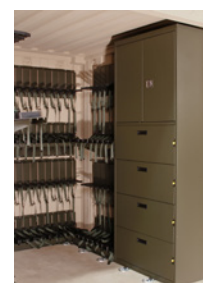

### ACCESSORIES:

The following is a list of quantities of what can be stored in each 15" x 34" single tier section:

- 30 - M9s (per drawer of large cabinet)
- 18 - M4s / M16s / M249s / M870s
- 8 - M240Bs
- 4 - M2s (plus barrel and spare barrel for each weapon)
- 3 - MK19s

**Contact Spacesaver for additional weapons systems storage opportunities**

*\* Lead times and pricing to be quoted on per-order basis*

### CONTACT SPACESAVER FOR AIR TRANSPORT CONTAINER OPTIONS

*Sizing, weapon capacity, and color options will be different than what is listed above.*
